

Aliens policing (residence permit procedures)

We are maintaining a legal practice in the field of aliens policing law, representing mainly students and employees in residence permit procedures, but our practice includes legal representation in procedures of other purposes of stay as well. We also represent our clients in procedures concerning the issuance of letters of invitation and in registration card procedures of EU and EEA nationals. Our services include filling in forms for the procedures, providing information regarding the necessary supporting documents and the procedure itself, maintaining contact with the aliens policing authority in person, through electronic means or via post (not regarding those procedural steps where the personal participation of the client is obligatory by law). Regarding that our Firm also maintains a legal practice in rental contracts, we are also ready to provide our clients with professional assistance concerning finding the suitable accommodation. As one of our primary fields is real estate law, we are ready to assist You in registering Your address in Your new own apartment as well.
